

**Transparency Initiative Coordinating Committee (TICC)
March 2016 Report**

The TICC's monthly meeting was held on March 2. There was an update on the TI member survey, which was launched in mid-February, and which will be closed in mid-March. We will share the results with the AAPOR Council as soon as they are compiled. Several members also reported on outreach to non-member institutions. We also completed work on the education document which provides annotated examples of qualitative research methods reporting that are consistent with Transparency Initiative standards. This document has now been posted online with our other educational resources.
