

Transparency Initiative Coordinating Committee  
Monthly Report  
April 2013

The TICC met on Wednesday April 10. The compilation of examples of TI-compliant methodological reporting was reviewed to insure consistency with the TI's transparency requirements. Several of the reports required minor modifications to be brought into compliance. After some additional editing, these examples will be posted on the Transparency Initiative's page on the AAPOR web site. The TICC also discussed plans for the upcoming pilot test. It was agreed that the test will be implemented after the annual conference.
