

Transparency Initiative Coordinating Committee

April 2014

The TI Coordinating Committee met twice in April, on the 2nd and the 23rd. The TI Core working group also met twice, on April 16th and 30th. Work this month has focused on the following topics:

- Continued design of the web-based application platform for Transparency Initiative application and review processes.
- Continued revisions of TI policies and procedures based on legal opinions obtained by AAPOR staff. We are in the final stage of this process and anticipate having it finalized shortly.
- Final revisions of scripts for TI online educational modules to reflect changes in the fees to be charged to TI members. We anticipate production of the final versions of these modules to commence shortly.
- We have also decided to offer those organizations that have previously signed on as supporters of the Transparency Initiative the opportunity to join the TI as charter members.
- Plans are also underway for the presentation that TICC will make at the annual conference, designed to provide membership with a report on activities that have taken place over the past year and our plans for implementing the TI during the Summer of 2014.
